## Projects

### Real-Time Chat Application

Real-Time Chat is a dynamic web-based platform designed to facilitate real-time communication through text messages, fostering seamless interaction and collaboration among users. Leveraging modern web technologies, the application provides an intuitive and engaging chat experience.

### Weather Forecast Application

Developed a weather forecast web application utilizing modern web technologies to provide users with accurate and up-to-date weather information. The application fetched data from reliable weather APIs and presented it in a user-friendly interface.
